

Daycare and Childcare Water Testing 2021

The New Jersey Department of Children and Families (NJDCF) and the New Jersey Department of Environmental Protection (NJDEP) provide guidance and a list of recommended water tests for daycare and childcare centers in the state. Some tests are required annually, while others can be required more or less frequently, so please check with the NJDEP Bureau of Safe Drinking Water for the specific schedule for your facility.

Sampling By Customer

For annual tests, such as lead (Pb) and copper (Cu) in drinking water, EMSL Analytical, Inc. can ship you bottles for collection at your site and shipment back to the laboratory.
